EXPERIENCE

Vue.js Frontend Engineer   August 2021 – September 2022
Mobile Tool Network   *Remote*

Develop and maintain the startup's front-end Vue.js interface.
- Utilize Vue.js styled components to streamline an outdated admin interface to improve order management and chart key sales data, leading to a 15% increase in sales revenue.
- Use fetch to query Laravel API data through inertia.js to build an interactive order history table that aesthetically displays relevant sales data, increasing order follow-through rate by over 7%

Frontend Engineer   June 2020 – August 2021
Ethode LLC   *Remote*

Assist and complete several high-impact projects for the agency's biggest clients.
- Quickly contribute to projects that require learning new tech such as Laravel and dotCMS to build and deliver solutions for multi-million-dollar clients.
- Refactor jQuery code to ES6 JavaScript for a multi-tenant Laravel app to improve code maintainability and increase front-end performance by over 15%.
- Learn the MVC pattern so I can contribute back-end code to help the team hit critical and time sensitive deadlines.

Vue.js Developer   Sept 2018 – Jan 2020
Fixd Repair   *Remote*

Join this startup's team to build and maintain a brand new Vue.js/Nuxt web app.
- Take an outdated WordPress site and build a new MVP with a tight 2 month deadline using Vue.js, vuex, and vue router.
- Use Vue.js, SCSS, and keyframes to develop an interactive location map that increases user engagement and retention.

PROJECTS

Breathr | *JavaScript, React.js, Redux, Laravel, SASS*   March 2023 – Present
- Query the YouTube API and control the player using action creators and reducers with the react-redux library.
- Seamlessly play youtube videos as a backdrop and integrate player controls using the react-youtube library.
- Allow users to save collections locally with localStorage for persistent storage.
