Experience

Laravel/PHP Full Stack Developer   November 2022 – December 2023
Various Clients   *Remote*

Creates and maintains several frontend/PHP projects.
- Create and maintain a user portal Laravel web app for a custom suspension bike shop, a JavaScript frontend for a cover letter SaaS, Stripe API integrations for a fundraising platform, and a custom WordPress theme + plugins for a HVAC company's knowledge base website.

Vue.js Frontend Engineer   August 2021 – September 2022
Mobile Tool Network   *Remote*

Develop and maintain the startup's front-end Vue.js interface.
- Utilize Vue.js styled components to streamline an outdated admin interface to improve order management and chart key sales data, leading to a 15% increase in sales revenue.
- Use inertia.js to fetch Laravel API data to build an interactive order history table that displays key sales data, increasing order follow-through rate by over 7%.

Frontend Engineer   June 2020 – August 2021
Ethode LLC   *Remote*

Assist and complete several high-impact projects for the agency's biggest clients.
- Quickly contribute to projects that require learning new tech such as Laravel and dotCMS to build and deliver solutions for multi-million-dollar clients.
- Refactor jQuery code to ES6 JavaScript for a multi-tenant Laravel app to improve code maintainability and increase front-end performance by over 15%.
- Utilize the MVC pattern to contribute back-end code to help the team hit critical and time sensitive deadlines.

PHP/CMS Developer   August 2018 – September 2020
Lead With Digital LLC   *Remote, Part Time*

Assist and complete several high-impact projects for the agency's biggest clients.
- Consume back-end API data to programmatically create over 100 interactive tables through a custom post type.
- Integrate a modern Laravel MVC-style framework (Roots/Trellis/Bedrock) in a WordPress environment to deliver high-end solutions for several clients.
- Drastically reduce page speeds (reducing First Contentful Paint (FCP) by up to 60%), maintain accessibility standards, and improve SEO for several client sites.

Vue.js Developer   Sept 2018 – Jan 2020
Fixd Repair   *Remote*

Join this startup's team to build and maintain a brand new Vue.js/Nuxt web app.
- Take an outdated WordPress site and build a new MVP with a tight 2 month deadline using Vue.js, Vuex, and Vue router.
- Use Vue.js, SCSS, and keyframes to develop an interactive location map that increases user engagement and retention.

Projects

Breathr | *JavaScript, React.js, Redux, PHP, Laravel, Inertia.js*   March 2023 – Present
- Using industry best practices, securely authenticate and manage multiple app users and their data.
- Use Redux to handle front end state of user actions, the video player, and toggleable components.
- Completely redesign Breathr from the ground up using MUI Joy, Tailwind, and the Material UI React component library.
